

Bekah Michael is the executive staff director of the Ohio Cyber Range Institute and Associate Professor in the School of Information Technology at the University of Cincinnati. She has been an educator for over 8 years focused on cybersecurity and capstone courses. She leads the Bachelor of Science in IT and Cybersecurity students to create solutions to real world problems through a year-long capstone that culminates in a public conference and publication of their work. She also leads the Ohio Cyber Range Institute, a center hosted at UC, with a statewide mission to improve cybersecurity education, workforce, and economic development. Her role as the Assistant Director of Workforce Development and Technology in the School advances industry recognized bootcamps and other non-traditional training to help fill the cybersecurity and IT workforce gap. Prior to coming back to UC to teach, she was an IT professional for more than 14 years focused on software engineering and business analysis in aerospace and defense manufacturing software and medical technology. She holds a Bachelors and Masters of Science in Information Technology and the CISSP certification.
